BOOK SYNOPSIS

The geometric shapes and natural forms, captured with exceptional precision in Ernst Haeckels prints, still influence artists and designers to this day. This volume highlights the research and findings of this natural scientist. Powerful modern microscopes have confirmed the accuracy of Haeckels prints, which even in their day, became world famous. Haeckels portfolio, first published between 1899 and 1904 in separate installments, is described in the opening essays. The plates illustrate Haeckels fundamental monistic notion of the "unity of all living things" and the wide variety of forms are executed with utmost delicacy. Incipient microscopic organisms are juxtaposed with highly developed plants and animals. The pages, ordered according to geometric and "constructive" aspects, document the oneness of the world in its most diversified forms. This collection of plates was not only well-received by scientists, but by artists and architects as well. Rene Binet, a pioneer of glass and iron constructions, Emile Galle, a renowned Art Nouveau designer, and the photographer Karl Blossfeld all make explicit reference to Haeckel in their work.
