## BOOK SYNOPSIS

Excerpt from The Indian and His Problem The Indian problem has now reached a stage where its solution is almost wholly a matter of administration. Mere sentiment has spent its day; the moral questions involved have pretty well settled themselves. What is most needed from this time forth is the guidance of affairs by an independent mind, active sympathies free from mawkishness, an elastic patience and a steady hand. The purpose of this book is to present a birds-eye view of the existing situation, and a suggestion or two for the relief of some difficulties which still confront our Government. For twenty-five years I have mixed with Indians. I was more or less intimately acquainted with all my predecessors as Commissioner during that period, and wish here to record my tribute of respect for as conscientious and painstaking a series of officers as could be found in their times in the public service. The fact that I did not follow directly in their footsteps must not be interpreted as any disparagement of their motives or their wisdom, but as due to the different conditions obtaining when they and I respectively took charge. For the Indian problem has assumed a wide variety of phases since the Government began making any serious attempt at its solution.
